Onuki Laboratory in	Assoc. Prof. Motoharu	Our laboratory belongs to an interdepartmental master/Ph.D. program	1) Sustainability	UTSIP students can participate in "sustainability education
Graduate Program in	<u>ONUKI</u>	on sustainability science: "GPSS-GLI". Students select their own	2) Ssustainability education	evaluation" project. The University of Tokyo is now
Sustainability Science-		research topic related with sustainability by themselves and conduct	3) Sustainability science	coordinating research and education activities under a
Global Leadership		research by interacting many faculties and students with different	4) SDGs	concept of Sustainable Development Goals (SDGs). In
Initiative (GPSS-GLI)		academic background in our group. Currently, we are conducting		addition to participating core educational activities of
		following research: "disaster recovery and resilience", "environmental		GPSS-GLI including "GPSS-GLI seminars" and some of
		pollution and risk", "sustainability education evaluation", "negotiation		the core courses, they are expected to conduct interview
		and consensus building for sustainability", "sustainability of civil		surveys of GPSS-GLI faculties and students on their
		infrastructure under shrinking society", "Smart City Projects in		research topics and linkage between their topics and
		Kashiwanoha", etc.		SDGs. By using several methods including network
				analysis, transdisciplinarity of GPSS-GLI will be assessed
				in the project. Further comparative study between GPSS-
				GLI and other sustainability programs in the world could be
				possible.
				In addition to the above-mentioned topic, other topic is
				possible based on the applicant's interest.
